## CLARESHOLM LOCAL NEWS

Spring is here—lawn mowers have started in town this week.

Born, on April 15, to Mr. and Mrs. B. Couits, a 9 lb daughter.

Clark Bros. are preparing to open a room in the rooms being vacated by W. Mackintosh.

H. W. D. Milburn of the Canadian Bank of Commerce, Vulcan, has been transferred to Clareholm.

The opening dance was held in the new amusement hall in the basement of the L. D. S. church last Saturday night.

The Canadian Forestry Association's tree planting car will be at Clareholm on Friday, April 23rd, with moving pictures in the evening.

Arnstad Bros. have taken over the insurance and real estate business of R. E. Moffatt. Their announcement appears in another column.

The annual meeting of the Clareholm Tennis Club will be held in the Bank of Commerce on Wednesday, 21st April, at 8 p.m. All interested are requested to be present.

Mr. and Mrs. J. W. Morrow and daughter turned the first of the week from California, where they spent the winter. They motored through and report good roads most of the way.

The weather this week has been warm and favorable for farm work. There were light showers on two occasions. Farmers are all on the land now and seedling is in full swing.

The building formerly occupied by Mark Fisher's store on Third Avenue has been remodeled and will be occupied by W. Mackintosh with his general store. Mr. Mackintosh is moving in this week.

Betty Compsion in "Ramshackle House" at the Rex theater on Friday and Saturday nights this week. Released by Producers Distributing Corporation. Also good pictures Monday and Tuesday next.

"The Ten Commandments" at the Rex theater last Friday and Saturday. Three big houses. It was shown for an additional day on Tuesday night, when there was another good sized crowd in attendance.

Servants will be held in the Church of England on Sunday, April 25th, to be conducted by Rev. W. C. Marsh, of Calgary. 8 a.m., holy communion. 11 a.m., morning prayer. 7:30 p.m., evening song. The L.O.O.F. will attend the evening service in a body.

### Boys' and Girls' Swine Clubs

The Provincial and Dominion Governments have co-operatively organized boys' and girls' swine clubs throughout the three western provinces. The Canadian Pacific Railway Company offers as a prize a trophy to each of three clubs on C. P. R. lines winning these boys' and girls' swine club competitions, in Manitoba, Saskatchewan and Alberta.

In addition, the winning teams (members of club using C. P. R. lines) will be taken to the Royal Winter Fair at Toronto next November as guests of the Canadian Pacific Railway Company.

These three cups will be competed for each year, and each cup must be won three times by one club before it becomes the permanent property of the club. In recognition of the accomplishment of winning individual members of team, medals will also be awarded annually to be retained by them.

Canada's position in the markets of the world as a profitable hog producing country will be governed largely, if not entirely, by the type of hog which Canadian hog producers adopt. The Canadian Pacific Railway believes a practical demonstration to be the most effective teacher and has decided to continue the award of these trophies for the purpose of further encouraging the production of the approved type of hog.

For further information desired and assistance in organization, development and instruction please write to S. G. Carville, Livestock Commissioner, Parliament Buildings, Edmonton.

## Much Interest in the Power Farming School

That it was really practical and worth while, seemed to be the opinion of the large number of farmers who attended the power and farming school at garage and theater last week, and as one man put it, "no one could listen to those talks and see those films without learning something." Mr. S. C. Hinking of the Ford Motor Company of Canada, Limited, and Mr. G. Cochran of the Oliver Chilled Plow Company, proved themselves lecturers who not only had a sound knowledge of their subjects, but had the knack of transferring that knowledge to listeners.

Those who were in attendance at the school received many valuable pointers from these men on power farming, soils, preparation of seed bed, and conserving soil moisture. The mechanical course was most instructive to those who own or operate Ford cars or tractors, as it explained in detail the best method of handling these vehicles without injuring them, and when injured how to repair them.

The Ford man pointed out that while the engine in the Fordson tractor was much heavier and larger than the motor in the Ford passenger car, it is exactly the same in principle and design. This is by intent and not accident, since knowledge of the motor in the Ford car is almost universal and the similarity in design simplifies the study of tractor engines.

The baseball season in the major leagues opened on Wednesday, with Babe Ruth and Walter Johnson in the line light.

## EARLY CLOSING BY-LAW

Notice is hereby given that a petition has been presented to the Council of the Town of Clareholm under the provisions of The Early Closing Act, praying for the passing of the following clause:

### By-Law No. 227

A By-Law of the Town of Clareholm to provide for the early closing of shops.

WHEREAS a petition has been circulated throughout the Town praying that certain shops be closed during certain periods; AND WHEREAS the said petition has been signed by at least two-thirds of the shops affected by the said petition;

AND WHEREAS the Council of the Town of Clareholm desire it advisable to grant the prayer of the said petitioners;

NOW, THEREFORE, the Mayor and Council of the Town of Clareholm, under the authority and subject to the provisions of "The Early Closing Act," being Chapter 127 of the Revised Statutes of Alberta, enact as follows:

1. "Shop" shall have the same meaning as defined in "The Early Closing Act."

2. All shops within the limits of the Town of Clareholm shall close at 6 o'clock in the afternoon on each and every day except Saturdays except as hereinafter provided.

3. All shops within the limits of the Town of Clareholm shall close at 12 o'clock noon on each and every Wednesday between May 15th and August 15th, both dates inclusive, in each and every year hereafter.

Any person violating any of the provisions of this By-Law shall be liable to the same penalties as are provided in The Early Closing Act.

Done and Passed in open Council this 14th day of April, 1926.

Mayor

Secretary-Treasurer.

Notice is hereby further given that objections to the petition presented to the Council praying for the passing of such by-law on the ground that such petition is insufficiently signed or otherwise affecting the validity or sufficiency thereof must be filed with the Secretary-Treasurer of the Town on or before the 10th day of May, 1926; and if no such objections are filed before the said date the Council will forthwith proceed to pass the said closing by-law.

Dated at Clareholm this 9th day of April, 1926.  
Claude J. Amundsen,  
Secretary-Treasurer.

## No Enduring Security Can Be Found In Armaments And In Separate Alliances

Edward Grey's conclusions are real, and they have the sanction of common sense. He is not a man who knows, and who has been through Hell for his wisdom. He does not see any hope in the "new diplomacy" for that may be just as dishonest as the old. Nor does he flinger over the distribution of "war guilt," though he believes that Prussia militarism was the precipitating agent for the debacle. Regardless of Germany, he asks:

"With Europe an armed camp could peace have been preserved much longer? Every country had been piling up armaments and perfecting preparations for war. The object in each case had been security. The effect had been precisely the opposite of what was intended and desired. Instead of a sense of security there had been produced a sense of fear and four propensities to violence and catastrophe."

He goes on to show that "the notion that Germany was a danger to Europe was merely a temporary expedient, such as foreign misanthropes control, is an illusion. In the long run there can be no security in Europe without a Germany that is genuinely working for peace, but it is useless for the victors to insist that better way and give Germany a chance to join."

"The lesson of European history is so plain. It is that no enduring security can be found in competing armaments and in separate alliances. There is no security for any one unless it is a security in which all move."

"That is the high truth of Lord Grey's book. It was written before the signing of the Locarno treaties, but it might have been the charter behind them. How then can it be applied? Parity by good will and by parity through the solemn realization that unless man can live by his conscience he will perish."

"War used to imply a contest between armies; it will henceforth by common consent mean the destruction by chemical agencies of the crowded cities of population. It will mean physical, moral and economic ruin. . . . There will be no secure peace until the great nations of the world have a consensus of opinion among them sufficient to insure confidence that they will stand by each other to avoid, to suppress, or to avenge and insulate."

He believes that though England and her dominions are shy of pledges to the League of Nations, the League of States refuses to join, yet public opinion is in fact deeply concerned and slowly grasping the truth that participation in armaments is no real security. The next step is the realization that a sense of security will prevent armaments. Then the problem will be faced, how to produce this unmitigated feeling of security. "The solution of this problem is the supreme need of civilized mankind."—From a Review of Lord Grey's "Twenty-Five Years" in the Survey.

### World Poultry Congress

Large International Gathering To Be Held This Year In Ottawa

Arrangements are well under way in Ottawa for holding the World Poultry Congress in the Canadian capital from July 27th to August 4, 1927.

The World Poultry Congress is held every three years. The first took place at the Hague in 1921 and the second in Spain in 1924. At the second congress, Canada presented an invitation for the third international meeting of poultrymen to take place in Ottawa in 1927. This invitation was accepted.

The next World Poultry Congress is to be the largest international gathering which has taken place in Canada.

Before the formal invitations were issued some twenty countries had already signified their intention of being officially represented.

Invitations have been issued to practically all foreign countries and all sections of the British empire over the signature of His Excellency Baron Byng of Vimy, Governor-General of Canada.

### B.C. Honey Production

Number of Beekeepers in Province Are Increasing

Despite weather conditions that were most unfavorable to honey production, the beekeeping industry of British Columbia showed a steady advance last year, according to the annual report recently submitted to the B.C. Production amounted to 623,310 pounds, as against 579,259 pounds in 1924. The average production per hive, spring crop, was 41 lbs., as compared with 46 lbs. in 1924, and 32 lbs. in 1923. The number of beekeepers shows an increase, rising from 1,498 in 1924 to 2,425 in 1925. By the end of last year there were 15,505 hives, as against 14,044 in the previous year, an increase of 910.

### Land Sales Improve

Greater Demand Is Shown For Farm Property in the West

Figures secured from eleven land selling organizations, show that land sales in the prairie provinces for 1925 totaled 673,042 acres, or three times the combined total of the three preceding years. Practically all the sales were made to land users, and it is of interest to note that the land sold 77 per cent. was raw land meaning new farms. In addition to sales of private lands, homestead entries of the government, totaling 62,490 acres, taking up in 1925.

### Lumber Industry Important

Province of British Columbia Now Supplying World

British Columbia's lumber industry has dealt with in an address by Ralph S. Plant at the Optimists' Club in Vancouver. He characterized the history of lumbering in British Columbia as a story of romance and daring, and pointed out how the province today was supplying the world.

Interesting Find of Russian Explorers Imbedded in a party of Russian explorers discovered the remains of an extinct animal believed to have died 50,000 years before the birth of Christ. The skin was a specimen that it was easily removed. Some of the hairs preserved three inches. An analysis of the stone contents revealed grass and flowers of the plants which grow in Northeastern Siberia today.

### Pulp From Straw

The Elwood Pulp and Paper Company, which has acquired a site in St. Boniface, will not be in the newspaper mill with a capacity from 25 to 40 tons output daily. According to a statement issued here by T. B. Pollmer, the company president, the mill will use chinery for manufacturing pulp out of straw.

Vancouver Firm Accommodation Vancouver was never so well equipped to handle a large flow of grain, through five elevators with a capacity for accommodating 205,000 bushels per hour or 4,100,000 bushels daily in the aggregate. About 50,000,000 bushels of grain, it is anticipated, will pass through the port during the present season.

Always tell the truth and you will never have to fix up excuses.

### Strength Of Western Wheat Pool

Glasgow Herald Says It Is the Biggest

The Glasgow Herald, commenting on the government's proposal to grant £2,000,000 for the encouragement of empire trade, says: "It is something of a paradox that while the government proposes to spend £2,000,000 to assist the producers and producers of the dominions to market their commodities here, many of our importers apparently are gripped with fear at the marketing power already possessed by important sections of empire producers."

The Herald proceeds to cite the Western Canada wheat pool as an important example of acquired power and strength, but says: "New Zealand was the pioneer in forming wheat pools and was soon followed by Australia."

The ruinous prices obtained for the record wheat crop of 1923," the Herald continues, "may be said to have been the provocation to action by the dominion wheat producers, yet so swiftly has Canada adopted the pooling idea that its wheat pool actually ranks as the highest selling agency in the world."

The Herald says certain pools will make mistakes and will require to learn from experience. "The Canadian Wheat Pool," it adds, "may find that values can fall as well as rise for the latter portion of the crop. Criticism at all events had better be suspended."

The Herald concludes by saying: "We believe a new form of marketing is a necessary experiment. If it succeeds it will undoubtedly tend to the ability of Western Canadian agriculture and will accelerate land settlement, increasing production, which will ultimately be to the consumer's advantage."

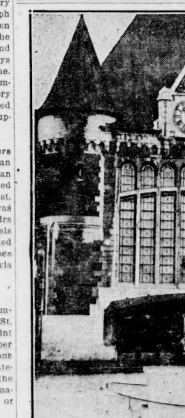

### Registered Seed Grain

Over Fifty Per Cent. of Registered Seed Grain Grown in Saskatchewan

Over 90 per cent. of all registered seed grain grown in Canada, was produced in Saskatchewan last year. Seed cleaning machinery was installed at Moose Jaw in the fall of 1924 by the Registered Seed Growers' Co-operative Association and between January, 1925, and before seeding time of the same year, about 55,000 bushels of registered grain and over 200,000 lbs. of clover were cleaned and marketed to Saskatchewan farmers. The season of 1925-1926 is expected to be more favorable, as the organization in addition to grain and clover, is handling broom grass, rye grass and corn.

### Must Be Busy Man

I have been in my service in a great many ways for 11 years. I feel that you ought to appreciate it. Remember your clothing will need cleaning and pressing. Also that your hair will need cutting, or you will need a clean, clean shave. Don't forget to face your face at the restaurant. Oil cases and tubes vulcanized. Automobile truck for hire—C. E. Jones—Brookview, Va., Union.

Fine Ice Statuary at Quebec

Not the least of the many attractions that draw flocks of visitors to Quebec City for the Frontenac Winter Sports Season just terminated, were the many fine examples of statuary cut in ice that stood in front of the station, railway stations and prominent buildings all over the Ancient Capital. Of these one that drew a

### Improved Farm Lands

Average Value of Occupied Farm Lands in Canada a Whole

The average value of occupied farm lands for Canada as a whole, including both improved and unimproved, as well as dwelling houses, barns, stables and other farm buildings, was \$28 per acre in 1925, as compared with \$27 in each of the two preceding years, according to a report of the bureau of statistics. By provinces the averages are as follows, with the preceding year's values given in brackets: Prince Edward Island, \$45 (40); Nova Scotia, \$27 (23); New Brunswick, \$34 (27); Quebec, \$54 (52); Ontario, \$67 (65); Manitoba, \$29 (25); Saskatchewan, \$24 (24); Alberta, \$26 (25); and British Columbia, \$38 (35).

### Egg-Laying Contest

Canada Makes Good Showing in Competition With the World

Canada is well to the fore among the nations of the world which take part in the egg-laying contest for hens during 1925. The average production by Canadian hens entered in the competition was 174.6, which compares with the high of 210.3 made by New Zealand birds and the low of 118.3 record from Belgium.

As follows: United States, 164.4; British Isles, 171.1; Netherlands, 178.5; Denmark, 145.7; Tasmania, 157.5; Australia, 202; and South Africa, 162.6.

### Tobacco Growing In Exports

Industry Is Now To Receive Further Government Assistance

Tobacco growing in Ontario is to receive further government assistance. A commission of three professors in agriculture, on instructions from the minister of agriculture, will make a survey to ascertain the soils best adapted to the culture of tobacco. They will also inquire as to the best varieties, both for the Ontario soil and for the markets. Soil tests will be made on various farms, as also at the government experimental stations within the tobacco districts.

### Ledge Of White Marble

Important Discovery Is Made On Vancouver Island

What may develop into an important industry is the discovery of a ledge of white marble off Pilegona's cross road on the Malahat Highway in Vancouver Island. Tests were made recently by experts, who are convinced that the Malahat marble is of the highest grade. A ledge of over 150 feet of the white stone is in sight and indications are that the quarry may contain exceptionally high-grade white marble in large quantities.

### New Gas Flow

It is reported at Calgary that a new gas flow of 2,329 feet deep, estimated to be 200,000 a day, in the Montrose well in the Turner Valley, forced oil up between the casing. Government petroleum engineer David described the strike as "A good showing."

## New Variety Of Wheat May Have Effect Of Revolutionizing Grain Growing in the West

The new wheat named "Garret" developed at the Dominion experimental farm at Ottawa, will be available for distribution this spring, and it is conservatively stated may have the effect of revolutionizing grain wheat growing in Western Canada. No more could be said of the potentially claimed for this new variety that it will probably have a stimulation as great as when Marquis wheat was first developed and made available to farmers.

A decade and a half ago Marquis wheat, which was produced after long years of experimenting upon demands for an earlier maturing wheat, proceeded to revolutionize grain growing in the prairie provinces, and has been an outstanding factor in the development of area into one of the great granaries of the world. Marquis wheat revolutionized the period between seeding and harvesting from 120 to 110 days, which meant that wheat of the finest quality could be garnered well in advance of the time necessary for the ripening of former varieties, and that the risk of injury from rust, hail and frost—principally the first—was largely diminished. It meant that hard spring wheat could be cultivated successfully in areas much farther north, and it brought millions of acres in Western Canada within the wheat belt.

It was estimated last year that 90 per cent. of the spring wheat production in Canada, and 60 per cent. of that harvested in the United States, was of the Marquis variety. Marquis wheat has added hundreds of millions of dollars to the wealth of Western Canada, and the world benefit resulting from the discovery has been estimated at half a billion dollars.

Now the new wheat, Garret, steps upon the stage, and its discovery means to be an achievement of yet greater moment. Despite the tremendous boon of Marquis, it has been believed that perfection was not attained in the development of a wheat suited to the western climate. The annual loss sustained in the last days of the crop season by rust, a destructive disease which attacks the wheat in its ultimate ripening, is stated to be repeatedly a fourth of the western harvest. Working from Marquis wheat, experimenters have been ceaseless, looking towards the production of a wheat which would have the same gluten content and high milling quality as Marquis, and yet would mature at a still earlier period. Garret wheat would appear to be the desideratum. It reduces the period between seeding and harvesting by as often ten days, or to one hundred days, and is said to be in every respect the equal of Marquis.

The development of Garret wheat has been the work of patient, painstaking men as characterized Marquis. Experimenting continued from the point where Dr. Saunders, the discoverer of Marquis, left off. The development of Garret wheat has been the work of patient, painstaking men as characterized Marquis. Experimenting continued from the point where Dr. Saunders, the discoverer of Marquis, left off.

By many additional advantages the new wheat possesses, which will make it very desirable to farmers and others, are pointed out. It matures earlier than Marquis, and is more resistant to rust, and is more resistant to hail, which had the possibility of great injury. Many additional advantages the new wheat possesses, which will make it very desirable to farmers and others, are pointed out. It matures earlier than Marquis, and is more resistant to rust, and is more resistant to hail, which had the possibility of great injury.

Many additional advantages the new wheat possesses, which will make it very desirable to farmers and others, are pointed out. It matures earlier than Marquis, and is more resistant to rust, and is more resistant to hail, which had the possibility of great injury.

Western Canadian agricultural experts express opinion along the new wheat, which will make it very desirable to farmers and others, are pointed out. It matures earlier than Marquis, and is more resistant to rust, and is more resistant to hail, which had the possibility of great injury.

### Canada's Leading Manufacturing Industry

Pulp and Paper Industry Has Made Rapid strides

One of the outstanding features of Canadian industry development in the past twenty years has been the rapid growth of the pulp and paper industry from a position of relative insignificance to that of the leading manufacturing industry in Canada. It attained this position in 1925, when it displaced the flour milling industry which had held first place in 1921 and 1922. There were 125 plants manufacturing pulp and paper in 1925, with a capital investment of \$420,467,696 and a combined output valued at \$187,174,703. Since these figures were compiled, the industry has made considerable headway and statistics covering operations for the year 1926, will undoubtedly show an even better relative position, insofar as the other major industries of the Dominion are concerned.

### Saskatchewan Horses

Remarkable Showing Made By This Province At Fair Fairs Last Year

Saskatchewan horses made a remarkably good showing at the Toronto Royal and International exhibitions last year, judging from the first record of winnings. With 23 entries, 35 prizes were won at the Toronto Royal, 19 for Clydesdales, 14 for Belgians and 10 for Percherons. Five championships, 1 special trophy and 4 reserve championships were included. In the entries at the International show at Chicago, 24 Saskatchewan horses carried off 4 prizes, which included 3 championships, 1 reserve championship and 1 special medal.

### Keep This Dark

Remember (to non-) Look through the key hole in the parlor. "Non" I did." "And what did you find out?" "The light."

If your doctor gives you up it is time to give up your doctor.

### Toronto's Big Fair

Canadian National Exhibition Now Approaching Imperial Status

Indications that the Canadian National Exhibition is approaching an Imperial status are the attendance of two million people at future fairs, were features of the annual report of the exhibition's executive. "The trend toward empire or world fair proportions," the report said, "was never more clearly defined than at this moment, when we have adequate before us for space from distant parts of the British Commonwealth as India, Africa, Gold Coast, Barbados, Honduras and New Zealand, while such countries as Mexico, Colombia, Czechoslovakia and Switzerland are also adding for space. There is not sufficient to provide the amounts requested."

### Good News For British Navy

"Salt Jack," otherwise salt pork, which has been an important part of the British navy's rations for centuries, has been handed by an order of the admiralty. It is announced that no salt pork henceforth will be served on British warships. Canned meats and canned vegetables are to take their place as reserve food when the fresh articles are not available.

### Forgot At The Source

"What's that piece of cord that round your finger for?" "My wife put it on to remind me to post her letter."

"And did you do it?" "No; she forgot to give it to me."

### Here and There

The Mills, driving Brewer's famous Russian wolf hounds, won the Strongheart Trophy in the 96-mile Dog Derby race at the Banff Winter Carnival and soon after left to enter the American Dog Derby races which were held at Ashton, Idaho.

Five thousand settlers are in sight for Canada this year under the Land Settlement scheme, according to Major John Barnett, Chairman of the Soldier Settlement Board at Winnipeg. "The majority will come from Great Britain and will be prepared to take root in Canadian soil," Major Barnett said.

Word has been received at Canada Pacific headquarters of the death of James McGown, Superintendent Engineer of British Columbia coast service. Mr. McGown was born in 1863 and entered the service of the Canadian Pacific steamship in 1891 as fourth engineer. He brought over the Canadian Pacific steamer "Princess Marguerite" from Glasgow to Vancouver last year.

An indication that big fish are migrating from the waters around Florida and Mexico to New Zealand is forecast in a special cable received recently. Zane Grey, the famous American writer, who is in New Zealand at present, caught the world's record swordfish recently. The monster weighed six hundred and eighty-five pounds and is large in proportion.

Stricken sick suddenly, Mrs. Charles Harris, wife of the president of the Carling Brewing and Malting Company, London, Ont., telephoned to Mrs. Leon, her sister-in-law, wife of the vice-president of the company, who was in Montreal with her husband. Mr. and Mrs. Leon left Montreal in a special Canadian Pacific train, which made the run to Toronto in six hours and forty-three minutes, just in time to make the connection with the regular train which leaves Toronto for London at 6:45 a.m.

# Ford PRICE CHANGE

Introduction of the improved Ford closed models in colors has substantially increased the demand for these popular cars. In line with the policy to give its customers the benefit of all reductions in production costs, the Ford Motor Company of Canada, Limited announces substantial reductions in all closed models except the coupe. These reductions effective as of February 11th.

	New Price	Old Price	Reduction
Fordor	\$755	\$895	\$140
Tudor	695	755	60
*Chassis	325	335	10

Added refinements in the new model runabout, touring car and light delivery have necessitated a slight price increase. These prices are now as follows:

	New Price
*Runabout	\$410
*Touring	440
*Light Delivery	435

The truck chassis and coupe remain unchanged.

Coupe	\$665
*Truck	485

♦ Equipped with starter \$85.00 extra

### RAILROAD TIME TABLE

Northbound—No. 541 leaves at 7:53 a.m. daily except Sunday.  
No. 536 leaves 1:46 p.m. Tuesdays, Thursdays and Saturdays.  
Southbound—No. 542 leaves 10:06 p.m. daily except Sunday.  
No. 535 leaves 11:04 a.m. Mondays, Wednesdays and Fridays.

### SETTLERS FOR WEST ARRIVE BY C.N.R. SPECIAL

THE first week of March saw the arrival of the advance guard of the heavy movement of immigrants to Canada anticipated for this spring, when six hundred Britishers and Europeans arrived at Winnipeg en route to their destinations in British Columbia and the prairie provinces. This number, arriving in the evening by special and regular Canadian National trains, were immediately re-packed and the majority left the same night for their new homes.

A party of fifteen English boys ranging from 13 to 17 years of age is shown grouped around the engine that brought the immigration special into the Canadian National depot. Good homes on farms for each of these sturdy young lads had already been arranged by Capt. T. Smith, of the Church Army Disfranchising Home, Winnipeg, who is shown near the engine of the group.

Below, at the left, is a typical group of rugged Central Europeans, several hundred of whom were included in this contingent of settlers. At the right, three little new Canadians were delighted to have their pictures taken on top of the family baggage—C.N.R. Porters.

## Where Soil Mining Is Practised

The Effect of Grain Growing on the Fertility of Soil

Grain growing as at present practised in the prairie provinces with its necessary summerfallowing tends to destroy the soil's organic matter and deplete the nitrogen content. This has been proved in an investigation made by the division of chemistry, the results of which are detailed in a new bulletin of the department of agriculture by Frank T. Shutt, Dominion chemist. Analysis of soils from Portage in Prairie Man., showed that after twenty-five years of grain growing, interspersed with fallowing, there was loss of almost 55 per cent. in organic matter and nitrogen. In a similar test of soils from Indian Head, Sask., it was shown that in a period of twenty-two years the soil lost 50 per cent. of its original nitrogen, of which 10 per cent. was due to removal of straw crops and 40 per cent. to loss by fallowing and other cultural operations. From analysis of other series of soils from Indian Head, Sask., it was indicated that in thirty-eight years the loss of nitrogen from the virgin soil was 40 per cent., of which roughly 17 per cent. was removed by crops and 23 per cent. by cultivation and the practice of fallowing. Dr. Shutt notes that there is a loss of nitrogen in the rate of this destructive process as the years go on, and sooner or later a point will be reached at which the depletion, although not negligible, will be comparatively slight. He states that the remedy is the following: a series of rotations which would include grasses and clovers. The bulletin, which may be obtained free from the Publications Branch, Department of Agriculture, Ottawa, gives the results of the practice of these rotations on the maintenance of soil fertility.

## Thinks Canadians Pessimistic

People Decried Their Country Says Former Member of London County Council

Canada, by reason of its geographical position, appeals more strongly to the prospective British emigrant than do Australia and New Zealand. But while the Dominion has been able to lure its native citizens after such appeals, the people in the colonies to the south of the equator have not been so successful in their own country, and do so ungraciously, declared David Hazel, former member of the London County Council in his address at Montreal. "Since my arrival in Canada I have been struck with the pessimism that prevails, and Canadians must get rid of this," he said.

## Constructing Aerial Garage

London Company Solves Problem of Scarcity of Locomotives

An aerial garage is being constructed in London, Ontario. They have located the high, domed roof above Queen's Road Underground station in Kingston. They have taken a lot of the air space out of the station and from the top of the roof to the platform. The new towers are building in this space a considerable number of heavy concrete floor supported by iron trusses. As laid in the neighborhood is both scarce and dear. It is expected that this inventory will meet with its reward.

## Not Much Humiliation

A gentleman was one day walking down a street in Belfast when he saw an Irish woman weeping. As he was passing he she stopped him and said:

"Could ye spare a copper for an old woman, sorr?"

The gentleman taking pity upon her gave her sixpence.

"Oh bless 'ee, sorr," said the old woman, "and may every hair on 'ee head be a candle to light you to glory."

Taking off his hat and showing a bald head, the gentleman said to her: "It won't be much of a torchlight procession, murther."—*Chicago Herald*

Nothing For the English

Lord Ashley, who recently visited Australia in the role of an emigrant, gave an address at the Ladies' Imperial Club, London, W., recently, and in reply to a query said that in Australia the Jews had all the land, the Jews had all the money, the Irish had all the government jobs, and they were left for the English or Australians.—*London Daily Mail*.

Australian's Generosity

Sir Joseph Cook, Australian high commissioner in London, has been invited by the Commonwealth Government to present the Australian pavilion at Wembley to the Legislature of the British Empire.

W. N. U. 1221

## Moisture In The Incubator

Showing the Effect of Humidity on Artificial Incubation

Theaporation of moisture from the egg during the process of incubation is perhaps the most important factor affecting artificial incubation in arid, semi-arid, and high altitude regions. When dry or cool weather prevails evaporation is the cause of many poor hatches. In order to find a remedy experiments have been conducted for some years at the experimental farm at Letbridge, Alta., from which it was found that the rate of evaporation can be successfully controlled by regulating the humidity of the air in the incubator. It is easy to get the humidity desired by hanging a moistened pad, made of burlap wrapped around a shingle, near the radiator pipes under the top of the incubator. In a circular describing the experiments, which may be obtained free from the Publications Branch, Department of Agriculture, Ottawa, he states that the best results are obtained when the relative humidity is between 60 and 70 per cent. for the first two weeks, and somewhat drier until the nineteenth day, then again brought up to from 60 to 65 per cent. During the three years of the investigation it was found that only one-half as many eggs were required to produce 100 per cent. of good per cent. relative humidity as are required with 55 per cent.

## Sugar and Syrup

Annual Maple Sugar Crop Is Increasing In Value

The Canadian maple tree continues to yield its annual crop of sweetness. The crop last year exceeded a value of \$10,000,000 in sugar and \$15,000,000 in syrup. It was the highest in 1924, but over a million more in the previous season. This increase of the maple tree is credited to the more to higher prices for the crop than in former years and to the fact that it is now being planted in large quantities. The province of Quebec has continued to lead in sugar production, yielding as much as half the total crop, Ontario, Nova Scotia and New Brunswick yielding the remainder. There has been a great improvement in the process of sugar making in recent years. The replacement of old sugar kettles by the modern copper and rolled work evaporators, has raised the quality both of the syrup and sugar produced. The adoption of this better equipment has given the industry a worthwhile place in the economy of the province. It is still standing a good deal of sugar, with these products, as with other foods, the quality has much to do with the price of the crop which can be the only when processed in the modern way.

## Office And The Man

One Time When Deference Was Not Considered Necessary

No man knows better how to maintain the dignity of office than the Marquis of Crew, British ambassador in Paris, who has celebrated his sixtieth birthday. But he is fond of telling how the late Duchess of Devonshire, when he was still a young man, once distinguished between the official and the man. When Viceroy of Ireland, he was crossing from Killybegs to Holyhead, and part of the deck was reserved for him. Seeing the Duchess on board, he invited her to share his place. She, who was a regular, and remembering that in Irish waters he remained viceroy, paid him due deference. No sooner did they land at Holyhead, however, than she commanded: "Now, Bobby, just take hold of my bag and run as fast as you can and recover your companion for me on the train."—*London Sunday Times*.

## Could Give Lessons To Nero

Fire Starts Every Time Band in Palm Beach Plays

Nero had nothing to do with the municipal band at West Palm Beach, Florida. Almost every time they "blow" something there.

On July 15, 1925, the band was playing "There'll be a Hot Time in the Old Town Tonight," as the title indicates, the band was playing.

Recently, as the band was playing "Keep the Home Fires Burning" at a public affair, a fire started and burned down a block away.

The following day the band played at Lake Kola, and as they struck up the strains of "Red Hot Mambo" the burst forth in a private hospital across the lake.

Fire Chief Alfred Stedler said the band should be equipped with asbestos uniforms.

Life insurance is no doubt a good thing, but what some men need is insurance against fire.

## The Surveyor's Telescope

How Far Can the Surveyor See With It?

A question commonly asked the topographical surveyor is, "How far can you see with the telescope of your transit?" The question is really put in a rather bad form, as with the naked eye, unaided by a telescope, we can see stars in the sky which are millions of miles from the earth. What is really meant is, "What is the farthest distance at which you can detect certain details with your telescope?" For, as is generally known, the duty of a telescope is to make objects appear closer than they really are. Thus, a tree one mile away is observed through a telescope magnifying twenty times, it will appear as if only one-twentieth of a mile distant. This property enables the surveyor to read marks on his rods which would otherwise be invisible to him.

The telescope of a surveying instrument permits the instrument to be accurately pointed in a given direction. In this way it performs the same function as the sighting of a rifle. For greater precision, of course, than would ever be possible with bare sight. Indeed, before the invention of the telescope, astronomers and surveyors had to employ bars fitted with sights to make their observations. Today, the people may be good or bad. It is necessary that the surveyor be provided only with good eyes if he is to make accurate maps.

In connection with the work of mapping our Dominion carried on by the topographical survey, department of the Interior, a special testing laboratory is maintained at Ottawa where all instruments intended to be used by the surveyors are tested before they are accepted from the instrument makers. The test is severe, and inspectors must rigidly meet the required specifications to pass. By the means, inferior instruments are at once detected and much expense and responsibility is avoided for the work of sending instruments with low grade accuracy into the field.

## The Dominating Sex

It Is Coming To This, That Women Will Supercede Men In Business World

When you see this, efficient young women filling positions of trust and responsibility at Ottawa where the men are scarce, you will make a good case for the women. The profession, women college professors and women who can still make a good thing out of life. The adoption of this better equipment has given the industry a worthwhile place in the economy of the province. It is still standing a good deal of sugar, with these products, as with other foods, the quality has much to do with the price of the crop which can be the only when processed in the modern way.

## British Orders Tremendous

The National Selling Foresters' Association of Great Britain has asked for quotations on 20,000 tons of Canadian lumber from Canada, Feb. Quebec, with the privilege of taking 200 more if quality, price and pedigree of the first shipment are satisfactory.

## C.P.R. Car Transports Queen Mother's Remains

From London to Montreal

The Canadian Pacific Railway has been asked to transport the remains of the late Queen Mother of Italy, who had been buried in the Vatican.

Through a strange chain of circumstances, a railway car which was originally built as an observation car for the Canadian Pacific Railway, was used as a chapel ardente and funeral coach to transport the remains of the late dowager Queen Margherita of Italy. Thousands of her beloved subjects followed the car, leading the Queen Mother of Italy, who had been greatly loved and respected because of her kindness, to her last resting place.

In 1912 an observation car service on the Australian State Railways was operated by the Canadian Pacific Railway as part of a reciprocal arrangement with the Australian Government, for some years they have been in regular communication with the Canadian Government. Above the car which was used as the Italian Queen's funeral car at the conclusion of peace were sold.

## The Best Start

Being Born On A Farm No Handicap To Youth With Ambition

The best start in life anyone can have is to be born on a farm. The next best is to spend one's youth on a farm.

Saskatchewan has just started a milestone to Ottawa. He was the premier of the province for four years. Before that he helped to organize the greatest grain-handling company in the world and was its first manager. Twenty-three years ago this present minister of railways, born on a tenant farm in England, was a young householder, a milkmaid from Yorkton beside his yoke of oxen, bought on credit, to the homestead where he first, by hard experience, began to apply his quick intelligence to the problems of western agriculture, transportation included.

Saskatchewan's present premier came to Western Canada from an Ontario farm at almost the same time as the Hon. C. A. Bunting. One came as an immigrant from England, the Hon. J. O. Gairdner as a native-born Canadian. Both men have had a hard work, and very often done so with very large direct profits but it offers many prizes and it is surprising how good a boost it gives a boy to be born or brought up on a farm—Saskatchewan Farmer.

## Ellen Terry's Secret Of Youth

Work Keeps People Young Says Famous Actress

When asked to give the secret of youth on the eve of her seventieth birthday, Ellen Terry, the famous actress, said: "Perhaps the first ingredients of the great recipe may be the love of beauty and the knack of seeing it. And along with beauty comes sympathy. Work, too, I assure you, has much to do with keeping one young. I mean well planned work, and above all, work you love."

The actress left London to mark her birthday at her country home.

## When the Paper Comes

Criticizing the home paper is a favorite pastime of a large number of people. Like public officials, who Mr. May says and is constantly before the public and its errors are easily detected. An individual may go through life making mistakes after mistake and few will know it, but let your newspaper even a small detail and the error becomes in the bank. Last year there was a debt of a few pounds and dollars outstanding.

Our respect for old age depends greatly on whether it is applied to men and women or to householding poultry.

## Orphanage Free of Debt

The report of the board of management of the orphanage at Indian Head was presented to delegates who attended the Grand Lodge Orphanage meeting at Regina. While none of the figures contained in the report were made public, it was stated that the orphanage was clear of debt and had a credit balance in the bank. Last year there was a debt of a few pounds and dollars outstanding.

Our respect for old age depends greatly on whether it is applied to men and women or to householding poultry.

## Life's business going?

"What I heard you had failed."

"No I have. They've just wound up the business."

## British Are Good Sports

English Home Crowd Are Never Heard "Razzing" Visiting Team

An extract from the report of a professional soccer game in an English paper says: "The crowd of 40,000 cheered to the echo the men who were facing the effects of the home team."

It's a way that English crowds have, whether they are watching football or any other kind of game. They want to see the home team win and they are disappointed if it loses, but above everything else they want to see a good game, a clean and a hot exhibition. It is quite common for a mighty throng to cheer the visiting players, and applaud their displays. No one ever heard an English home crowd "razzing" a visiting team on, or deprecating to put them off their game. Now and then an individual player is booed if he has not "played the game," but every bit of good play, individually or combined, is applauded without stint. An English crowd the game is everything, a win for the home team is hoped for, but it is secondary to the game, and the crowd is not disappointed. "British fair play."

Comparisons are odious; but a bare ball or hockey fan who "roasted" for his lack of interest in the game upon a bit of blip.

## Looked Like Fountain Of Youth

Old Magic Of Puddle Was Very Easily Explained

A very old dirt horse spashed through a puddle on a Boston street. As the water touched his hoofs, he seemed to be made young again. He took his head, whinnyed and trotted, and trotted at a round pace with his coal wagon. Had the water of the puddle been enchanted? Did he taste once more, in his marbled nostrils, the elixir of youth?

A young horse clip-clopped into the puddle. He began to rear and carol as if he were about to suffer transformation into a rooster.

And a very old man who was watching from the pavement decided that the puddle was in fact a magic puddle—perhaps the same magic Ponce de Leon was looking for when he said he dreams the golden city of Fozz.

The old man trotted across the Boston street and thrust his hand into the water. . . .

He sprang back with a sharp cry. Workers of the Boston Electric Blue Building Co. were called. They found that a short circuit caused by sticks on the puddle a charge of 120 volts.

## Jack Miner

The Man Who Made The Wild Goose Tame

Jack Miner is the owner of the Jack Miner, a famous bird of the world, who has been in the hands of the Canadian Government, Ontario, Canada, where thousands of ducks, geese and swans are fed during their migration periods. In spring and fall.

Jack Miner is the first man on earth to use the tools of the air as a mission to the world. He has been in the hands of the Canadian Government, Ontario, Canada, where thousands of ducks, geese and swans are fed during their migration periods. In spring and fall.

Jack Miner is the author of the book known as "Jack Miner and the Birds," which has had a tremendous sale in the United States and Canada.

Jack Miner is a lecturer, being the highest paid speaker in Canada. The Billy Sturdy to the Bird People.

Jack Miner is the man who, with his bird sanctuary, has made the town of Kingsville famous the world over. He has been in the hands of the Canadian Government, Ontario, Canada, where thousands of ducks, geese and swans are fed during their migration periods. In spring and fall.

Jack Miner challenges all the game warden in Canada to show as many ducks, geese and swans being protected and fed at one time.

Jack Miner is the man who, with his bird sanctuary, has made the town of Kingsville famous the world over. He has been in the hands of the Canadian Government, Ontario, Canada, where thousands of ducks, geese and swans are fed during their migration periods. In spring and fall.

## Bees In The Spring

The Important and Critical Time of The Bee Year

Spring is the most important and critical period of the bee year. The principal object of all manipulation during this period is to get a large number of bees reared in each colony and, later on, to prevent the tendency to swarm. For a maximum production of honey, says the Dominion chemist (Mr. C. G. Goodenough, B.S.A.) in his bulletin on "Bees and Flow to the Beekeeper," it is essential that the honey flow, an abundance of bees between the age of two and six weeks. If the bees were well prepared for winter, they are most left undisturbed for a while, but if stores have run short or if by death colonies have become weakened and there is danger of swarming, being robbed out, a short superficial examination should be made on a warm day.

Combs containing stores may be taken from colonies that have more than they need and given, providing healthiness is apparent, to those that are deficient. If there are not enough bees to cover two combs the colony should be united with a stronger one. The weak team, if possible, should be combined with a healthy one.

A warm day when the bees are flying freely should be chosen for making a sluggish combination of colonies. The bees are apt to be more docile. No colony that is found to be queenless or to contain a drone-bee queen should be united to one containing a fertile queen.

Colonies wintered out of doors should be kept in their wintering places until the end of April or the middle of June, in other words until settled warm weather. Protection to colonies wintered in the field depends upon the weather. It is best to shelter from the wind. If there is no water within easy reach it should be supplied in a shallow pail placed in or near the apiary. The colonies should be examined weekly, or fortnightly, if the weather is cool. All this and other valuable information is given in the bulletin, which can be had free on application to the Dominion Bureau of Entomology, Agriculture, Ottawa.

Jack Miner is the man who, with his bird sanctuary, has made the town of Kingsville famous the world over. He has been in the hands of the Canadian Government, Ontario, Canada, where thousands of ducks, geese and swans are fed during their migration periods. In spring and fall.

## Re-establishes Strength SCOTT'S EMULSION The Vitamins Food- tonic It's Cod-liver Oil Pleasant to Take

### WORLD HAPPENINGS BRIEFLY TOLD

The Ottawa city council has May 1 to September 25 for the period of daylight saving for this year.

The leaders of the conflict of the League of Nations have agreed to postpone the election of Germany to the league until September.

The London Daily Mail reports the massacre of a party taking electrical equipment in Llanes, forbidden city of Tibet.

Monsignor Ernest Van Roy has been appointed by the pope as Archbishop of Malines, Belgium, to succeed the late Cardinal Mercier, who died.

A tentative statement on Alberta's production of petroleum for 1925 shows that the 1925 output in the province alone was greater than the production for all Canada in 1924.

British Columbia tree seeds are being prepared for shipment to many parts of the world for reforestation purposes by the government lands and forestry branch, New Westminster.

A new type of rubber for motor bolts, by which it is possible to bring a wheel to a standstill within ten feet with the propeller in motion, has been invented by Mr. Rylander, a well known Swedish engineer.

Soviet Russia claims the distinction of having the first woman sea captain, Madame Tatiana Jakovleva qualified with honors as a "master of navigation." She will soon be given command of one of the Soviet's Black Sea merchantmen.

A new super-aerallium flying boat has been constructed at Pisa, Italy, for an experimental air service between Spain and South America. It is said the flying boat will be able to make a non-stop flight of 2,000 miles with 12 passengers.

**Rub it in for Lame Back**—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the instant stings in the joints come out and there are no stings grounds for saying that it is an excellent article.

**Indians Are Prosperous**—The Indians of the prairie provinces in 1925 reaped over a million bushels of grain and had on their farms fifty thousand head of livestock, according to government reports. The cultivated area of Indian lands was increased 11,235 acres during 1925, bringing the total up to 340,455 acres, of which 55,425 acres were sown to grain.

## She Could Hardly Do Her Housework Nerves Were So Bad

Mrs. I. M. Parks, Coonocan, Ont., writes: "I had heart and nerve trouble, and became so short of breath I could hardly do my daily housework, and was so nervous I could not think of staying alone as every little sound I heard felt like a shock to me."

### I Saw

recommended, so I tried a box, and after taking the second one I am now feeling like a different woman."

This preparation has been on the market for the past 22 years and has achieved a wonderful reputation for the relief of all heart and nerve troubles.

Put up only by The T. Millers Co., Limited, Toronto, Ont.

W. N. U. 1621

### TIPPITY-WITCH IRENE

I WONDER WHERE THEY CAN BE? I HAD THEM THIS MORNING!

IRENE, HAVE YOU SEEN MY FUR GLOVES? I'VE SEARCHED HIGH AND LOW BUT

HERE'S WHAT'S LEFT OF EM POP! I USED THE REST TO MAKE A PAIR OF KNEE MUFFS—

### By COLLEEN MOORE

## Greatest Wheat Producer

### Saskatchewan Leads in Production of Wheat, Oats and Flax

A survey of agricultural returns reveals that Saskatchewan, in addition to being the leading wheat producing province of the Dominion, is also the heaviest producer of oats in Canada, and similarly leads in the output of flax seed. Manitoba leads as a producer of barley and rye. Ontario is the greatest producer of alfalfa, while Quebec leads in the yield of hay and clover.

## A TIRED FEELING IN SPRINGTIME

Not Sick, But Not Up to the Mark  
You Need the Help of That  
Sterling Tonic, Dr. Williams' Pink Pills—They Give New Vitality.

While the passing of winter may make people feel weak, depressed and easily tired, the body lacks the vital force and energy pure blood alone can give. In a word, while not exactly sick, the indoor life of winter has left its mark upon you. A blood-building, nerve-toning tonic is needed to give you new health and energy. Dr. Williams' Pink Pills are an all-year-round tonic to build up your blood, but are especially useful in the spring. Every one helps to build up the blood, and with this new blood returns to you the cheerfulness and good health quickly follow.

If you are pale, easily tired, or breathless at the least exertion, if your complexion is poor or you are troubled with a limp, or eruptions, Dr. Williams' Pink Pills are just what you need to put you right. If you are nervous and are subject to headaches and backaches, if you are irritable and your sleep is disturbed, if you do not refresh you, or your appetite is poor, Dr. Williams' Pink Pills alone can give you the new blood, new strength and new energy this medicine always brings. Mrs. Emma Fraser, Three Lakes, Ont., says: "Two years ago my nervous system was in such a condition that life seemed a burden. I could neither work, eat or sleep well. I tried several medicines, but did not get any relief. In my condition seemed to be growing worse. Then Dr. Williams' Pink Pills were brought to my attention and I decided to try them. After using a few boxes there was no room to doubt that they were helping me. I continued their use until I felt it impossible to praise Dr. Williams' Pink Pills too highly."

**Keep Your System Toned Up**—Dr. Williams' Pink Pills for anemia, rheumatism, neuritis, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a regular habit of taking your pills through. You can get these pills through any druggist dealer or mail order house, or from the Dr. Williams' Medicine Co., Brockville, Ont.

## De Valera Resigns Sinn Fein Presidency

**Motion Favoring Republican Slings In Both Parliaments Rejected**  
Eamon De Valera, Irish Republican leader, has resigned the presidency of the Sinn Fein following rejection by the Ard Fheis, or Republican General Assembly, of his motion favoring the Republican representation in the Dail and Clatter Parliaments.

After a two days' secret conference, the Republican General Assembly, at Ard Fheis, rejected by a vote of 225 to 124, a motion by Eamon de Valera in favor of Republican representation in the Dail and the Northern Parliament, taking their seats as soon as the oaths recognizing the King are removed.

The opposition, headed by Mary MacSwiney and Father O'Flanagan, stood for adhering to the original abstention policy of the Republicans. Some observers of the situation predict that the defeat of the motion may prove the death blow to Mr. De Valera's influence among the Republicans.

The trouble with the present generation is that it is present everywhere but at home.

## ON THE AIR

### What is Doing in the World of Radio

Commander Richard Byrd's aerial polar expedition will carry short wave radio equipment expected to have a range of 1,000 miles.

The first broadcasting station in the Irish Free State has been erected near Dublin. The station operates on a wave length of 490 meters. Its call letters are 2-IR.

Station WJLAS, Louisville, Ky., offers prizes to all listeners who succeed in catching the station silent for as long as eight seconds during any of its evening studio concerts. The offer is effective until August 1, 1926.

Station KPNP, Honolulu, HI., has learned that 250 different names of radio sets are in use by its large audience. The information was brought out in the results of a contest recently held by the station.

In Japan "stealing the air" is now a misdemeanor and one that is causing much annoyance to radio broadcasting companies.

The radio world is optimistic, says the New York Herald Tribune. "The day will come when the King's speech to parliament or the most of the sacred white elephant in Siam will be to time in."

The Mexican Government makes use of radio to disseminate information to its people. Special attention is being given to the education of the Indians by means of radio. Recently the arts are placed under the purview of the Ministry of Education, and programs of special interest are broadcast.

**It Will Prevent Ulcerated Throat**—At the first symptoms of sore throat, which precedes the onset of influenza, take a spoonful of Dr. Thomas' Electric Oil. Add a little kerosene to it to make it swallowable. It will allay the irritation and prevent the ulceration which follows. It is so painful. Those who were periodically subject to colds have thus made themselves immune to attack.

**World's Oldest Hen**  
What is believed to be a record in hen longevity is reported by a reader of Pomar, Essex, where a cross-bred ultra-expanded Hamburg hen has just died at the age of 194.

## Relieved After Other Remedies Had Failed

### Ontario Lady Is Very Enthusiastic About Dodd's Kidney Pills

Mrs. P. Alexander Was Run Down, Had Pains in Her Back and Her Blood Was in Poor Condition. (Nickelton, Ont.—Special).—One more tribute to the great work Dodd's Kidney Pills are doing for women of Canada comes from Mrs. P. Alexander, who writes: "I have used your medicine for a long time and have been relieved of my kidney trouble. I was very run down and often had pain in my back. Mrs. Alexander writes: "My blood was also very bad. I read in the paper about Dodd's Kidney Pills and thought I'd try a box. I have tried many other medicines and they did not relieve the pain in my back. Shortly after taking half a box of Dodd's Kidney Pills I felt no pain in my back. Mrs. Alexander writes: "I have tried many other medicines and they did not relieve the pain in my back. I suffered very much from kidney trouble."

Weak, nervous, run-down women should give Dodd's Kidney Pills a trial at once.

A great many orators mix the oil of clove with the water of weak aroma.

An elephant can detect by scent the presence of a man at 1,000 yards.

**MURINE**  
NIGHT & MORNING  
KEEP YOUR EYES  
CLEAN CLEAR AND HEALTHY

Don't be hasty in jumping at a conclusion. You may not be able to collect your accident policy.

Eighty dollars for a five-day week is the demand for 15,000 New York union bricklayers.

## Why Bald So Young!

### Cuticura Will Help You

To prevent loss of hair. Dandruff, usually the cause of premature baldness, may be easily removed by regular shampoos with Cuticura Soap, preceded by touches of Cuticura Ointment. This treatment keeps the scalp clean healthy and promotes hair growth.

Sample Box Free by Mail. Address: Canadian Agents, The National Drug Co., Ltd., 100-102, Queen St. W., Toronto. Cuticura Shaving Stick 25c.

## Farmers Attention!

We have the new Copper Carb. for treating wheat. It is more effective than formalin, and does not require to be dissolved, but is used in the dry state. Feeds evenly through the drill without clogging. 2 oz. to the bushel necessary to remove smut.

We have also Blue Vitriol and Formalin.

## Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; not is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment — just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

### A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

## The United Church

"Our Modern Sabbath: How may Christians use it?" will be the theme upon which the Rev. Geo. Webber, will speak at the morning service next Sunday, April 18, at 11 o'clock.

The Rev. R. W. Hibbert, M.A., the field secretary for religious education in the United Church in Alberta, will be the speaker at the evening service. Mr. Hibbert will have a message of vital interest to all, and an inspiring service may be anticipated.

The Young People's Society of the local United Church will hold a special meeting at the close of the evening public service, to meet Mr. Hibbert, and receive a brief message from him, dealing with the practical work of the society. All young people are cordially invited.

dially invited to be present.

The Sunday school, with classes for those of all ages, meets at 12.15 immediately following the morning service. There is a welcome for all.

The regular mid-week services will be held in St. Andrew's Hall on Wednesday evening at 8 o'clock. Interesting Bible studies each week, in addition to the service of prayer and praise.

## Four Square Gospel

Stop the  
Thief-  
that steals  
Your  
Property

Sun, rain, frost and snow are the thieves that steal the very life out of your property.

Barns, fences, etc., destroyed by the elements are lost—there is no insurance and no replacement.

Protect your income against these destructive forces by investing in Red School House Paint.

Red School House Paint is the only paint that will protect your property from the elements.

It is a bright red that stops rot; it withstands the effects of sun, rain, snow, frost and fog; and will look well for many years.

Write us for free booklet, "Home Painting Made Easy" and "Good Farming." Send a post card for your name and address to our Winnipeg office today.

## Seed Grain for Sale

2000 bushels "Renfrew" Spring Wheat, cleaned, \$3.00 per bushel, sacks extra. Dominion seed test No. 65-2006. In six days 99% germination. This is the new wheat developed by the University of Alberta.

It is a very strong, vigorous wheat that over a period of six years has produced an average of 8 bushels per acre more than "Marquis." Renfrew is equal to Marquis in milling quality.

## A FINE BATHROOM

Modern fixtures have another advantage—they are easier to keep clean than the old-fashioned kind. Those beautiful smooth white surfaces can be kept in a glossy condition with very little care—and there are no difficult corners where only an acrobat could hope to clean successfully. Drop in and see our display of bathroom fixtures.

C. A. COUTTS, Phone 177

## Imperial Oil Limited, Clareholm.

We regret to announce to our customers and friends that Mr. J. W. Hallett has resigned his position with us after fourteen years management of our business.

Mr. C. Mogensen of Nobleford has been appointed agent and will endeavor to give the same Imperial service.

We wish to call your attention to our new Marulube oil which will be on the market in a few days and will be for sale by all good dealers.

Imperial Oil Ltd.

## Hair Grown or No Money

Notice the Van Ess flexible rubber massage cap on the bottle. You rub the bottle over your head and the rubber supplies feed the hair growing medicine into the scalp. One minute a day in your own home with Van Ess Liquid Scalp Massage means an abundance of new hair and the gloss and luster that come with perfect hair health.

FOR SALE BY O. L. REINECKE

## Paint! Paint! Paint!
